

For the big grant – towards a new Scout Hut

The Scouts are seeking to build a new HQ in the village after their current one was deemed unsuitable for scouting activities.

We are working with a local land-owner and have identified some land for a new HQ and now need to get the appropriate permissions. This will allow the Group to expand, offering Scouting for more young people in the community, it will be built sustainably yet the facility will be there for the long term and available for the community through provision of Scouting and outside this as a communal facility.

Scouting has a waiting list of over 100 people in the village and a suitable HQ will help the Group to meet this on-going demand. On-going maintenance will be covered from the current subscription received from members

The plans were shared with the Parish Council at their April meeting, has received positive feedback and helpful input which is being incorporated into the brief. A copy of which is attached.

Summary of the costs associated with your proposal, giving as much detail as possible as to whom payments will be made. Please use additional sheets if required.

ITEM	COST (£)
Architect Drawings	500
Pre-Planning Application Fees	180
Traffic & Access Survey & Associated Costs	750
TOTAL	1,430

If you are not applying for the full cost of your project from the Parish Council's Community Grant, where will the remaining funding come from?
