

Scouts - for the small grant for a Portable Defibrillator

The Scouts are seeking to have a portable defibrillator for medical emergencies. It will be available at Scout meetings and also when 'out and about' thereby offering the widest possible availability for this essential piece of medical equipment.

Having access to defibrillators is proven to save lives and many Scouting exercises take place in the wider outdoors, often miles away from this kind of equipment. Hence a portable defibrillator would serve these excursions as well as being available during Scout meetings. It will be accessible to the community outside Scouting hours as a wider network of defibrillators is created through the village.

ITEM	COST (£)
Lifeline AED Semi-Automatic Defibrillator (Will apply to British Heart Foundation for discount, otherwise will use Group funds to bridge any gap)	1,005
